Jilin University

2003 - 2007

SUMMARY

I am a dedicated Junior Full Stack Developer with strong communication and teaching skills. I excel at problem-solving and have a passion for learning new technologies. My diverse background in education includes experience working with high-high-functioning as well as university students. At the university level, I developed and managed IT curriculum while teaching courses on topics such as e-commerce and software tools like Flash, Dreamweaver, and Fireworks. I'm eager to bring my skills and enthusiasm to innovative projects in a dynamic and collaborative environment.

FULL STACK DEVELOPMENT

As a Junior Full Stack Developer, I completed an intensive Bootcamp where I gained hands-on experience with JavaScript, React, Ruby, and Ruby on Rails, HTML, CSS while building multiple applications such as [learnwise](#). Currently, I'm building apps while focusing on expanding my knowledge in React.

PROFESSIONAL EXPERIENCE

TEACHING ASSISTANT

Autism Spectrum Australia (Aspect)

2022 - Present

- Individualized, creative, and problem-solving-focused teaching to adapt learning strategies for high-functioning students with special needs (autism and advanced ADHD).
- Assisting in and conducting daily morning meetings to plan and organize group rotations and daily work structures, delegating responsibilities to ensure good communication and collaboration within the team.
- Assisted in the detailed planning of ongoing educational excursions throughout Sydney, which included driving a student bus.
- Ensured that all daily required routines and instructional tasks are completed.

ACADEMIC LEADERSHIP AND CURRICULUM DEVELOPMENT

College of Changchun Vocational Education

2008 - 2017

- Led the research and execution of new, innovative academic curricula
- Ensure up-to-date and top-standard educational content that meets industry demands by incorporating subjects such as logistics and cybersecurity.
- Guided students to first place in the National Electronic Information Competition in Beijing, earning recognition as an Outstanding Instructor at the national level.
- Acted as Employment Coordinator to enhance students' job readiness through various job programs and developed an internship program that successfully placed student cohorts in industry internships, facilitating employment for over 500 graduates.
- Led curriculum design for Electronic Commerce (EC) programs.
